Tools and Libraries: VS code, Git, GitHub, Figma, DB Designer, Slack, Chrome Dev Tools

Languages: English(Fluent), Japanese(Native)

APPLICATIONS DEVELOPED

Wearly, [GitHub](#) | [Live](#)

A full-stack web application for people who want to organize fashion items and save outfits digitally.

- Applied responsive and intuitive front-end components with **React.js**, **HTML**, and **CSS**
- Created **Express.js** routes on a **Node.js** server to manage data transfer between the client and **PostgreSQL** database
- Utilized **Babel** plugins and **Webpack** to transform and bundle front-end code for deployment in production
- Installed react-rnd package which can make elements draggable to arrange the position of items in an outfit

Cooking the World, [GitHub](#) | [Live](#)

Application for people who want to find international recipes and leave reviews or comments.

- Constructed a sitemap by utilizing **Figma's** wireframing tools to create a visual portrayal of the application for desktop and mobile responsiveness
- Engineered a dynamic sort feature by requesting data from a public API and implementing **AJAX** to display query results
- Wrote a DOM tree generator function in **JavaScript** to minimize and render repetitive HTML code
- Created **JavaScript** functions to enable adding comments on a recipe and utilized **JSON** to store that data in local storage and retrieve data from previous sessions

PROFESSIONAL EXPERIENCE

Full Stack Engineer Intern, *Michibiku Co., Ltd.*

Apr 2023 – Present | Remote (Japan)

- Maintaining and debugging digital transformation cloud services to optimize corporate governance performance, resulting in improving system stability and reliability and solving customer-facing bugs
- Developing front-end and modularized components of our cloud service with **Typescript** and **Next.js** and successfully resolved problems to merge pull requests in an efficient and timely manner
